INDEX TO VOLUME 22, 1968

Adaptation, effect of translocation heterozygotes, *Clarkia williamsonii*, 93
to heterogeneous environments, variation in heterophylly, *Ranunculus flammula*, 496
Adaptive changes, early prosimians, 19
Adaptive radiation, marsupials, 1
Adaptive significance, of mycophagy in stored-product Arthropoda, 785
of pigment polymorphisms in *Colias* butterflies, 437
Africa, *Bufo regularis* chromosome number, 37
Aggression, between males, evolution, Caprini, 817
sympatric bird species, 315
Agrostis tenuis, evolutionary processes, 108
Amazon Valley, geographical metachromism, 556
Amphiploids, *Phlox*, 612
Anser caerulescens, genetics of polymorphism, 289
Artemia salina, persimilis, sibling species, 373
Arthropoda, adaptive significance of mycophagy, 785
Australian honeyeater *Melithreptus*, evolution of ecological niches, 762
Baptisia sphaerocarpa, leucophaea, chemical and morphological hybrid index, 157
Batesian mimicry, *Limenitis astyanax, arthemis*, 699
Euphrasia, Calluna flowers, 736
Battus philenor, Papilio glaucus butterflies, geographic correlation with *Limenitis*, 699
Behavior, evolution, Caprini, 817
foraging, pine-dwelling warblers, 307
gulls on feeding areas, 193
variation in cave collembola, 237
Behavior patterns, sympatric bird species, 315
Bird song, effect on hybrid mating, 166
Birds, evolution of migration, 180
island patterns, 751
mimicry in sympatric species, 315
Brazil, geographical metachromism, marmosets, 556
Breeding-population size, leopard frog, 274
Bufo hemiophrys, evolutionary status, 583
Bufo regularis chromosomes, 42
Butterflies, *Euphydryas editha* on serpentine soils, 422
Euphydryas editha, oviposition, 799
inter-, intrapopulation variation, *Utetheisa ornatrix* complex, 719
mimetic vs. disruptive coloration, *Limenitis arthemis, astyanax*, 699
phenetics, *Euphydryas editha*, 46
variation of melanin pigment in relation to thermoregulation, *Colias*, 437
Butterfly polymorphism and natural selection, 481
Callithrix marmosets, geographic metachromism, 556
Caprini, intraspecific combat, evolution, 817
Captivity, effect on isolating mechanisms in *Gallus*, 576
Cave life, evolution in collembola, 237
Cercyonis oetus butterfly, oviposition, 799
Cetacea, phylogeny, 37
Chalcidoidea (Hymenoptera), speciation, 642
Character convergence vs. displacement, 315
Character displacement
and competition, warblers, 307
Character displacement
vs. convergence, 315
Chromatic variation, marmosets, 556
Chromatography, *Liatris*, 352
Phlox, 612
Plantago erecta on serpentine soils, 422
toad parotoid gland secretions, 583
Chromosomal polymorphism, *Drosophila subobscura*, 406
Chromosome number, *Ranunculus flammula*, 496
Utetheisa ornatrix complex, 719
Chromosomes, analysis techniques, *Artemia*, 373
Clarkia williamsonii, 93
Drosophila hybrids, 140
Drosophila willistoni species group, 649
infection and population structure, *Drosophila*, 337
lethal manifestation, *Drosophila*, 66
natural population, *Drosophila melanogaster*, 633
number in *Bufo regularis* species group, 42
Phlox, 612
Liatris, 352
supernumerary, *Haplopappus validus*, 748
Clarkia williamsonii, translocation heterozygotes, supernumerary chromosomes, 93
Climate, and pigment variation, *Colias* butterflies, 437
effect on *Drosophila melanogaster*, 633
Coiling measurement, fossil *Gryphaea*, 424
Colbert, Edwin H., Men and Dinosaurs, book review, 843
Colias butterflies, variation of melanin pigment in relation to thermoregulation, 437
oviposition, 799
Collembola, geographical variation, evolution, 237
Colombian populations, *Drosophila*, 66
Color variations, hybridization, *Dacus* (Diptera), 667
Coloration, correlated with vertebral counts, salamander, 76
effect on warbler hybridization, 166
factor in interspecific bird flocking, 315
mimetic vs. disruptive, *Limenitis* butterflies, 699
temporal, larval–pupal–adult correlation, *Euphydryas editha*, 46
Competition, Arthropoda on stored grain, 785
between rice varieties, 119
character displacement, warblers, 307
effect on sympatric species, 315
evolution of migration, 180

evolution of ecological niches, honeyeater *Melithreptus*, 762
mechanism of, effect on rice development, 529
segregating populations, rice, 332
wild and vestigial strains, *Drosophila*, 301
Cretaceous dinosaur extinction, 595
Cytology, *Liatris*, 352
Dacus tryoni, neohumeralis (Diptera), interbreeding, wild populations, 667
Davitaschvili's "The Contemporary Status of Evolutionary Studies in the West," review and comments, 426
Defense mechanisms, egg clustering, butterflies, 799
Defense of feeding areas by gulls, 193
Dendroica, competition and character displacement, classification, 307
Dentition, fossil mammals, 19
marsupial ancestors, 1
Peromyscus leucopus, 826
Depigmentation, depilation, metachromism, marmosets, 556
Desmognathus salamander, size–fecundity relationships, evolutionary implications, 806
Developmental, genetic homeostasis, flour beetles, 217
Dichanthium, diploid–tetraploid–haploid cycles, origin of variability, 394
Didelphis, "living fossil," 1
Dinosaur extinction, 595
Dinosaurs, book review of Men and Dinosaurs by Edwin H. Colbert, 843
Diploid–tetraploid–haploid cycles, origin of variability, *Dichanthium*, 394
Discrimination in mating, a measure, 125
Dispersal routes, Solomon Island bird fauna, 751
Disruptive vs. mimetic coloration, intergrading populations, *Limenitis arthemis, astyanax*, butterflies, 699
Distribution, *Clarkia williamsonii*, 93
Euphydryas editha, San Francisco Bay area, 422
orchids, affected by pollinators, 202
DNA, RNA, chemical isolation techniques, 398
Drift, random, *Mus*, 262
Drosophila, introgression, Panama, 140
melanogaster, competition between wild and vestigial strains, 301
lethal genes maintained, 66
relation of infection to population structure, 337
summer environmental variables, lethal and semilethal frequencies in a natural population, 633
metzii, pellewae, sympatric species, 140
polymorphism resulting from introgression, 140
pseudoobscura, uniform heterokaryotypic superiority for viability, 256
serrata, natural selection effect on productivity, population size, 55
subobscura, cumulative parental age effects, 406
willistoni species group, genotype frequency, mating success, 649
Drought effects on *Clarkia williamsonii*, 93
East Africa, variation, selection studies of *Lysimachia*, 228
Ecological niches, evolution, honeyeater *Melithreptus*, 762
Egg mass counts, leopard frog, 274
Endemism, plants in serpentine areas, 422
Solomon Islands bird fauna, 751
Environment, effect on phenotype, *Artemia*, 373
effect on shell variation, *Littorina picta*, 459
effect on variation, selection, *Lysimachia*, 228
Ephestia development, compared with *Euphydryas editha*, 46
Equability, a measure of climate, 595
Escherichia coli, yeast, rabbit liver sRNA methylation, 835
Euglossine bees, pollination by, 202
Eulaema cingulata, figured, 202
Eulaema meriana, figured pollinating *Stanhopea grandiflora*, 202
Euphrasia speciation, Europe, 736
Euphydryas editha, evolving a serpentine race, 422
oviposition, 799
phenetics of Jasper Ridge Colony, 46
Evolution, *Bufo hemiophrys*, 583
Cetacea, 37
color and hair pattern, marmosets, 556
current conceptions, 426
dark and light forms, *Colias* butterflies, 437
ecological niches, honeyeater *Melithreptus*, 762
euglossine bee–orchard relationships, 202
fitness, *Drosophila*, 55
foetal membranes, 211
geographical variation, collembola, 237
intraspecific combat, Caprini, 817
marsupials, 1
migration, 180
primates, 19
sympatric species, 315
Evolutionary implications, size–fecundity relationships, salamanders, 806
Evolutionary processes, copper tolerant *Agrostis tenuis*, 108
Evolutionary relationships, nucleic acid similarities, 398
Evolutionary significance, chromosome number, *Bufo*, 42
Experimental evaluation, premating isolation, *Hyla ewingi* complex, 659
Extinction, dinosaurs, 595
Fecundity, density, shell variation, *Littorina picta*, 459
Drosophila subobscura, 406
Fecundity–size relationships, evolutionary implication, *Desmognathus* salamanders, 806
Feeding habits, evolutionary trends, Australian honeyeater *Melithreptus*, 762
Feeding on fungi, breeding, Arthropoda in granaries, 785

Fertility, *Gallus* hybrids in captivity, 576
supernumerary chromosomes, *Haplopappus validus*, 748
Festuca microstachys complex, genetic divergence, 517
Fitness, advantage of heterokaryotypes, *Drosophila pseudoobscura*, 256
evolution of, 55
genotype frequency, *Drosophila willistoni* species group, 649
Heliconius numata, 481
Flight activity, related to body temperature, *Colias* butterflies, 437
Flour beetles, developmental and genetic homeostasis, 217
evolutionary advantage of mycophagy, Arthropoda, 785
Foetal membranes, origin, 211
Food habits and adaptation, primates, 19
Fossil *Gryphaea*, coiling measurement, 424
Fossil record, Mammalia criteria, 839
marsupials, 1
Fossil whales, 37
Frequency of mating, color form, *Dacus* (Diptera), 667
Frog, leopard, breeding-population size, 274
seasonal selection, 284
Gallus gallus, *sonneratii*, breakdown of isolation mechanisms in captivity, 576
Gene dispersal, *Phlox*, 130
Gene flow, between hybrid populations, *Thomomys*, 543
copper tolerant *Agrostis tenuis*, 108
Festuca microstachys complex, 517
Genetic coherence, *Euphrasia*, Europe, 736
Genetic, developmental homeostasis, flour beetles, 217
Genetic divergence, *Festuca microstachys* complex, 517
Genetic isolation, *Limenitis arthemis*, *astyanax*, 699
Genetics, *Dichanthium* agamospecies, 394
Heliconius numata, polymorphism, 481
polymorphism, goose *Anser caerulescens*, 289
Genome constitution, *Dichanthium* agamospecies, 394
Euphrasia, Europe, 736
Phlox amphiploids, 612
Genotype frequency, mating success, *Drosophila willistoni* species group, 649
Genotypes, adaptable and non-adaptable, heterophylly, *Ranunculus flammula*, 496
Geographic isolation, metachromism, marmosets, 556
Glaciation, effect on toad populations, 583
Goose, genetics of polymorphism, 289
Grasses, origin of variability, diploid–tetraploid–haploid cycles, 394
Growth rate, shell variation, *Littorina picta*, 459
Gryphaea, coiling measurement, 424
Gulls, defense of feeding areas, intrusion by young, 193
Haplopappus validus, supernumerary chromosomes, 748
Hardy–Weinberg analysis, *Limenitis* butterflies, 699
Hawaiian Islands, selection mechanisms and shell variation, *Littorina picta*, 459
Heliconius erato butterfly, oviposition, 799
Heliconius numata, natural selection and polymorphism interacting with sex, 481
"Hennig system" and systematics (book review), 646
Heterokaryotypic superiority for viability, *Drosophila pseudoobscura*, 256
Heterophylly, variation, *Ranunculus flammula*, 496
Heterostyly, *Narcissus*, *Mirabilis*, 645
Homeostasis, flour beetles, 217
Hybrid index, fertility, *Liatris*, 352
morphological and chemical combined, *Baptisia*, 157
Partula (Gastropoda), 684
Hybrid populations, *Thomomys*, 543
Hybrid *Ranunculus flammula*, heterophylly, 496
Hybrid swarm, plant *Liatris*, 352
Hybrid zone, *Drosophila* in Panama, 140
Hybridization, *Baptisia*, 157
Bufo hemiophrys, *americanus*, 583
Dacus tryoni, *neohumeralis*, 667
Hyla ewingi complex, 664
nucleic acids, and evolutionary relationships, 398
plant *Liatris*, 352
polyhaploids derived from hybrids, grasses, 394
variation, *Utetheisa ornatrix* complex (Lepidoptera), 719
warblers, 166
Hybrids, *Gallus gallus* × *sonneratii*, in captivity, 576
Phlox, 612
Hyla ewingi complex, postmating isolation, 664
premating isolation, 659
Hypertrichy, *Saguinus* marmosets, 556
Inbreeding, effects on flour beetles, 217
Incompatibility, incipient unilateral, plant *Leavenworthia*, 382
Infection, relation to population structure in *Drosophila*, 337
Inhibitor genes, *Ranunculus flammula*, 496
Insect foetal membrane development, 211
Insectivores, compared with primates, 19
Insects attracted to *Euphrasia*, 736
Interbreeding, frequency in two sibling species, *Dacus* (Diptera), 667
Intergrading populations, mimetic vs. disruptive coloration, butterflies, 699
Introgression, *Drosophila*, Panama, 140
warblers, 166
Island bird species, longer bills, 762
Island patterns in the Solomons bird fauna, 751

Isolating mechanisms, breakdown in captivity, *Gallus*, 576
pocket gophers, 543
reproductive, warblers, 166
Isolation, Australian honeyeater *Melithreptus*, 762
effect on salamander polymorphism, 76
genetic, *Limenitis arthemis, astyanax*, 699
geographic, *Bufo hemiophrys*, 583
marmosets, 556
partial reproductive, *Partula* (Gastropoda), 684
postmating, *Hyla ewingi* complex, 664
premating, *Hyla ewingi* complex, 659
reproductive, *Artemia*, 373
Festuca microstachys complex, 517
Solomon Islands bird fauna, 751
Isolation indices, 649
Karyotypes, *Bufo regularis* species group, 42
Phlox, 612
Leavenworthia, incipient unilateral incompatibility, 382
Lethal frequencies and summer weather in natural population, *Drosophila melanogaster*, 633
Lethal genes, *Drosophila*, 66, 337
Levene's isolation index, 649
Liatris, structure of polyspecies hybrid swarm, 352
Life history, *Desmognathus* salamanders, 806
insects feeding on fungi, 785
Uta stansburiana, book review, 841
Limenitis arthemis, astyanax butterflies, mimetic vs. disruptive coloration, 699
Littorina picta, selection mechanisms, 459
Longevity, *Drosophila subobscura*, 406
Mammalia, taxonomic limits, 839
Mammals, geographical metachromism, 556
Marking frogs for population size, 274
Marmosets, geographical metachromism, 556
Marsupials, origin, evolution, phylogeny, zoogeography, 1
Mating, a measure of discrimination, 125
Mating calls, isolation, *Hyla ewingi*, 659
toad populations, 583
Mating success, genotype frequency, *Drosophila willistoni* species group, 649
Melanin variation in *Colias* butterflies, 437
Melithreptus (honeyeater), competitive interactions, evolution of ecological niches, 762
Men and Dinosaurs, by Edwin H. Colbert, book review, 843
Mesogastropoda, selection mechanisms, shell variation, *Littorina picta*, 459
Metachromism, marmosets, 556
Metasequoia-dinosaur distribution limits, 595
Migration, effect on competition between two strains of *Drosophila melanogaster*, 301
evolution, 180
Utetheisa butterflies, 719
Mimetic vs. disruptive coloration, intergrading populations, *Limenitis arthemis, astyanax* butterflies, 699
Mimicry, butterflies, 699
polymorphism, selection, *Heliconius numata*, 481
to facilitate interspecific bird flocking, 315
Mirabilis, heterostyly, 645
Moorea, partial reproductive isolation in *Partula* (Gastropoda), 684
Morphological response to disruptive selection, 496
Morphology, ecology, Australian honeyeater *Melithreptus* and evolution of ecological niches, 762
Euphrasia flowers, 736
Partula (Gastropoda), 684
Phlox, 612
toad populations, 583
Mortality, young gulls, 193
Mus, effect of differential viability on population dynamics of *t* alleles, 262
Muscle evolution, intraspecific combat, Caprini, 817
Mycophagy, adaptive significance, Arthropoda, 785
Narcissus, heterostyly, 645
Natural populations, *Clarkia williamsonii*, 93
Colombian *Drosophila*, 66
competition between wild and vestigial strains, *Drosophila*, 301
Drosophila, 140
melanogaster, infections, 337
summer environmental variables, lethal and semilethal frequencies, 633
Heliconius numata, 481
heterokaryotypic superiority for viability, *Drosophila pseudoobscura*, 256
interbreeding, *Dacus* (Diptera), 667
Rana cyanophlyctis, 87
variation, selection, environment, *Lysimachia*, 228
Natural selection, copper tolerant *Agrostis tenuis*, 108
effect on productivity, population size, *Drosophila serrata*, 55
gull feeding behavior, 193
polymorphism, butterflies, 481
rice, 529
Nucleic acid similarities, evolutionary relationships, 398
Odontology, book review, 842
Orchid pollination by euglossine bees, 202
Origin, evolution, marsupials, 1
whales, 37
Osteology, whales, 37
Oviposition, *Euphydryas editha* butterfly, relation to other butterflies, 799
Oysters, coiling measurement for fossils, 424
Papilio glaucus, Battus philenor butterflies, geographic correlation with *Limenitis*, 699
Parental age effects, *Drosophila subobscura*, 406
Parotoid secretion, chromatography, *Bufo*, 583
Partula (Gastropoda), partial reproductive isolation, 684
Peromyscus leucopus, components of variance, odontometric traits, 826

Peyer, Bernhard, odontology, book review, 842
Phenetics, *Euphydryas editha*, 46
Phenotypic variation, *Limenitis* butterflies, 699
Phlox, amphiploids, genome constitution, 612
local gene dispersal, 130
Phylogenetic systematics (book review), 646
Phylogeny, mammals, 1, 19
Phytogeography, *Euphrasia*, Europe, 736
Phlox, 612
Plantago erecta, chromatography, relationship with butterfly *Euphydryas*, 422
Pleistocene ice, effect on salamander polymorphism, 76
Plethodon cinereus, breakdown of polymorphism, 76
Pocket gophers, hybrid populations, 543
Pollen dispersal distances, *Phlox*, 130
Pollen fertility, *Phlox*, 612
Pollination, by euglossine bees, 202
incipient unilateral incompatibility, *Leavenworthia*, 382
Pollinator adaptation, *Euphrasia*, 736
Pollinators, *Phlox*, 130
Polymorphism, breakdown in salamander *Plethodon cinereus*, 76
chromosomal, 93
Drosophila subobscura, 406
genetics in goose *Anser caerulescens*, 289
leopard frog, 284
natural selection, butterflies, 481
resulting from introgression, 140
shells, *Littorina picta*, 459
Utetheisa ornatrix complex (Lepidoptera), 719
Polyphyly, whales, 37
Polyploidy, *Euphrasia*, Europe, 736
Phlox, 612
Polytypism, *Utetheisa ornatrix* complex (Lepidoptera), 719
Population biology, *Euphydryas editha*, 46
Population dynamics, effect of differential viability, *Mus*, 262
Population size, estimates, leopard frog, 274
Population structure, seasonal changes and infection, *Drosophila*, 337
Postmating isolation, *Hyla ewingi* complex, 664
Premating isolation, *Hyla ewingi* complex, 659
Primates, origin, evolution, 19
Primatology progress, Starck, D., et al., book review, 843
Pseudosinella hirsuta, geographical variation, evolution, 237
Rabbit liver, *E. coli*, yeast, sRNA methylation, 835
Rana cyanophlyctis, temperature tolerance and vertebral fusions, 87
pipiens, breeding-population size, 274
seasonal selection, *burnsi* type, 284
Random drift, actual vs. "effective" size of frog population, 274
Ranunculus flammula, variation in heterophylly, 496
Relict population, *Bufo hemiophrys*, 583
Reproduction, grasses, 394
Reproductive behavior, toads, 583
Reproductive biology, *Euphydryas editha*, 699
Reproductive isolation, *Artemia*, 373
breakdown in captivity, *Gallus*, 576
Festuca microstachys complex, 517
Partula (Gastropoda), 684
Thomomys species, 543
Reproductive organs, *Limenitis* butterflies, 699
Partula (Gastropoda), 684
Reproductive stimuli, warblers, 166
Rice, competition in mixtures of varieties, 119
competition in segregating populations, 332
mechanism of competition among phenotypes, 529
RNA, DNA, chemical isolation techniques, 398
RNA methylation, evolutionary significance of yeast, *E. coli*, rabbit liver, 835
Salamanders, breakdown of polymorphism, 76
size–fecundity relationships, evolutionary implications, 806
Sanguinus mystax, *fuscicollis*, geographical metachromism, 556
Seed development, inter-racial crosses, *Leavenworthia*, 382
Seed dispersal, *Phlox*, 130
Selection, against homozygotes, *Mus*, 262
against warbler hybrids, 166
cave collembola, 237
copper tolerant *Agrostis tenuis*, 108
courtship patterns, *Gallus*, 576
favoring mimicry, disruptive coloration, *Limenitis arthemis*, *astyanax*, 699
for migration, 180
for variable environmental conditions, flour beetles, 217
heterophylly, *Ranunculus flammula*, 496
mechanisms, intraspecific shell variation, *Littorina picta*, 459
metachromism, mammals, 556
of characters, sympatric species, 315
of mates, dimorphic goose *Anser caerulescens*, 289
Pleistocene ice effect on salamander polymorphism, 76
salamander size, 806
seasonal, leopard frog, 284
temperature tolerance of frogs with vertebral fusions, 87
variation in isolated populations of *Lysimachia*, 228
Selective forces, mimicry, *Limenitis* butterflies, 699
polymorphism interacting with sex, *Heliconius numata*, 481
primate ancestors, 19
Selective mycophagy, evolutionary adaptation, Arthropoda, 785
Serpentine soils and endemism, 422
Sex ratios, *Limenitis* butterflies, 699

Sexual behavior tests, *Drosophila subobscura*, 406
Shell variation, selection mechanisms, *Littorina picta*, 459
Size–fecundity relationships, evolutionary implications, desmognathine salamanders, 806
Skull development, Caprini, 817
primates, 19
Snails, partial reproductive isolation, *Partula*, 684
Social mimicry, character convergence vs. displacement, 315
Solomon Islands bird fauna patterns, 751
Soviet thought on evolution, 426
Speciation, cave collembola, 237
Chalcidoidea (Hymenoptera), 642
evolutionary significance, *Euphrasia*, 736
incomplete, *Partula* (Gastropoda), 684
orchids and euglossine bees, 202
Solomon Islands birds, 751
Spectrophotometry, *Colias* butterflies, 437
Stalker–Charles isolation index, 649
Stanhopea grandiflora, figure of pollination by *Eulaema meriana*, 202
Starck, D., et al., primatology, book review, 843
Sterility, causes, *Artemia*, 373
Supernumerary chromosomes, *Haplopappus validus*, 748
Survival rates, shell variation, *Littorina picta*, 459
Survival value, behavior of gulls on feeding areas, 193
Sympatric species, selection of characters, 315
Sympatry, *Festuca microstachys* complex, 517
Systematics (book review), 646
t alleles, house mouse, 262
Taxonomy, Australian honeyeater *Melithreptus*, 762
Drosophila willistoni species group, 649
Euphrasia, Europe, 736
Festuca microstachys complex, 517
mycophagy, Arthropoda, 785
Partula (Gastropoda), 684
Teeth, variation, *Peromyscus leucopus*, 826
Tegumentary pigment, evolution, mammals, 556
Temperature, lethal frequencies, *Drosophila melanogaster*, 633
Temperature tolerance, frogs with vertebral fusions, 87
Therian mammals, included in Mammalia, 839
Thermal limits, dinosaurs, 595
Thermistor instrumentation, *Colias* butterflies, 437
Thermoregulation and variation of melanin pigment in *Colias* butterflies, 437
Thomomys, hybrid populations, 543
Tinkle, D. W., *Uta stansburiana* life history, book review, 841
Toads, comparison of relict population with main population, 583
Tolerance, measurement for copper in plants, 108
to temperature, frogs with vertebral fusions, 87
Translocation heterozygotes, supernumerary chromosomes, *Clarkia williamsonii*, 93
Tribolium castaneum, *confusum*, developmental and genetic homeostasis, 217
Tularosa Basin, metachromism, mice, 556
Uta stansburiana, life history, book review, 841
Utetheisa ornatrix complex (Lepidoptera), variation, relation to hybridization, 719
Variability, origin of, *Dichanthium* agamospecies, 394
Variation, Australian honeyeater *Melithreptus*, 762
chromatic, marmosets, 556
Limenitis butterflies, 699
color pattern, *Dacus* (Diptera), 667
developmental and genetic homeostasis, flour beetles, 217
Euphrasia flowers, 736
evolution, *Pseudosinella hirsuta*, 237
in heterophylly, *Ranunculus flammula*, 496
inter-, intrapopulation, *Utetheisa ornatrix* complex, 719
melanin pigment in relation to thermoregulation in *Colias* butterflies, 437
oviposition patterns, butterflies, 799
phenotypic, within *Festuca microstachys* complex, 517
selection in isolated populations of *Lysimachia*, 228
selection mechanisms and shell size, etc., *Littorina picta*, 459
style lengths, *Narcissus*, *Mirabilis*, 645
teeth, *Peromyscus leucopus*, 826
year-to-year color pattern, *Euphydryas editha*, 46
Venom comparisons, *Bufo hemiophrys*, 583
Vertebral counts, correlation with coloration, salamander, 76
Vertebral fusions affect temperature tolerance of frogs, 87
Vertebrate foetal membrane development, origin, 211
Vertebrate odontology, book review, 842
Viability, *t* alleles, *Mus*, 262
uniform heterokaryotypic superiority, *Drosophila pseudoobscura*, 256
Warblers, competition and character displacement in, 307
isolating mechanisms, 166
Wave action, measurements of, effect on shell variation, *Littorina picta*, 459

EVOLUTION

INTERNATIONAL JOURNAL OF ORGANIC EVOLUTION

Volume XXII, 1968

RALPH G. JOHNSON
Editor

GERALD R. SMITH
Managing Editor

Published Quarterly
At the Allen Press, Inc., Lawrence, Kansas
By the
Society for the Study of Evolution

CONTENTS OF VOLUME 22

AGNEW, A. D. Q. Variation and Selection in an Isolated Series of Populations of *Lysimachia volkensii* Engl. 228

ALLARD, R. W., AND L. W. KANNENBERG. Population Studies in Predominantly Self-pollinated Species. XI. Genetic Divergence Among the Members of the *Festuca microstachys* Complex 517

ALSTON, RALPH E. (See Baetcke, Karl P.) 157

AQUINO, R. C. (See Jennings, Peter R.) 529

ASKEW, R. R. Considerations on Speciation in Chalcidoidea (Hymenoptera) 642

AXELROD, DANIEL I., AND HARRY P. BAILEY. Cretaceous Dinosaur Extinction 595

AYALA, FRANCISCO JOSE. Evolution of Fitness. II. Correlated Effects of Natural Selection on the Productivity and Size of Experimental Populations of *Drosophila serrata* 55

BAETCKE, KARL P., AND RALPH E. ALSTON. The Composition of a Hybridizing Population of *Baptisia sphaerocarpa* and *Baptisia leucophaea* 157

BAILEY, HARRY P. (See Axelrod, Daniel I.) 595

BAND, H. T., AND P. T. IVES. Genetic Structure of Populations. IV. Summer Environmental Variables and Lethal and Semilethal Frequencies in a Natural Population of *Drosophila melanogaster* 633

BARATELLI-ZAMBRUNI, L. (See Halfer-Cervini, A. M.) 373

BATEMAN, A. J. The Role of Heterostyly in *Narcissus* and *Mirabilis* 645

BOCK, WALTER J. Phylogenetic Systematics, Cladistics and Evolution (Review) 646

BOGART, JAMES P. Chromosome Number Difference in the Amphibian Genus *Bufo*: The *Bufo regularis* Species Group 42

BRADSHAW, A. D. (See McNeilly, T.) 108

BROWER, LINCOLN P. (See Platt, Austin P.) 699

CASTRO, L. E. (See Hoenigsberg, H. F.) 66

CHRISTIANSEN, KENNETH, AND DAVID CULVER. Geographical Variation and Evolution in *Pseudosinella hirsuta* 237

CLARKE, BRYAN. (See Murray, James.) 684

CLEMENS, WILLIAM A. Origin and Early Evolution of Marsupials 1
